Why are there still **risks** in datacenters designed with redundancy as per TIA-942 Standard and/or UTI Guidelines?

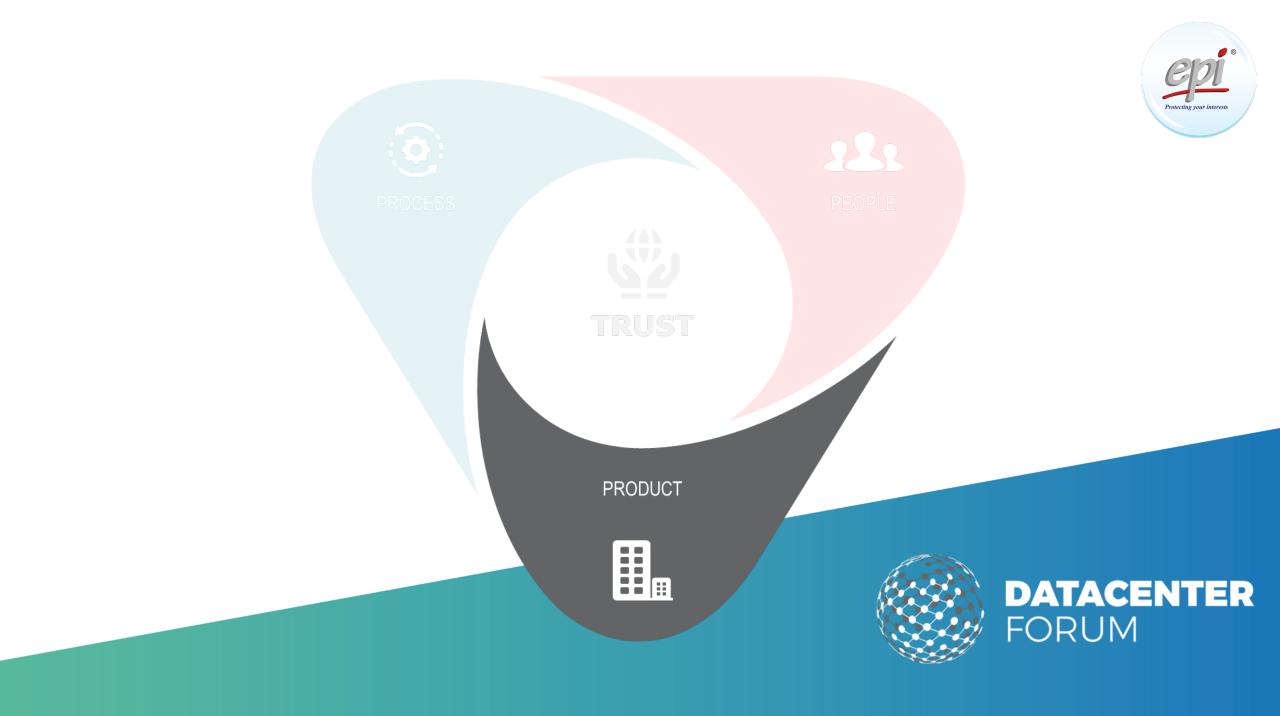

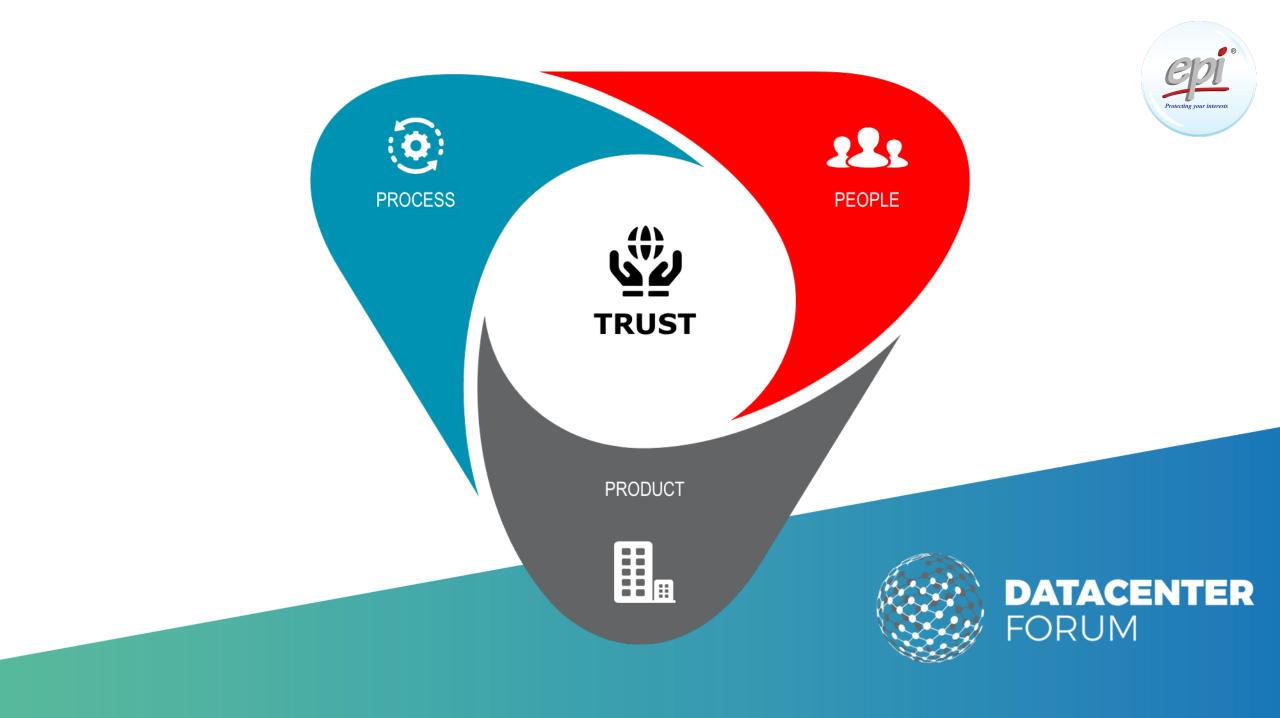

DATACENTER FORUM
Rated / Class / Tier levels

Rated 1	**Rated 2**	**Rated 3**	**Rated 4**
Base Line Availability	Improved Availability	Concurrent Maintainable	Fault Tolerant
N Capacity without redundancy	Due to addition of redundant components to critical parts of the facility	Data center can undergo any form of planned maintenance without the need to shutdown which supports 24x7 operations	allows concurrent maintainability and one (1) fault anywhere in the installation without causing downtime

PROCESS

PEOPLE

PRODUCT

DATACENTER FORUM

Human Error / Human Factor

Causes of human related downtime

1. Processes at an incorrect maturity level in relation to the business objectives

2. Insufficient integration between processes

3. Human errors

4. Human violations

Human Error: the good news!
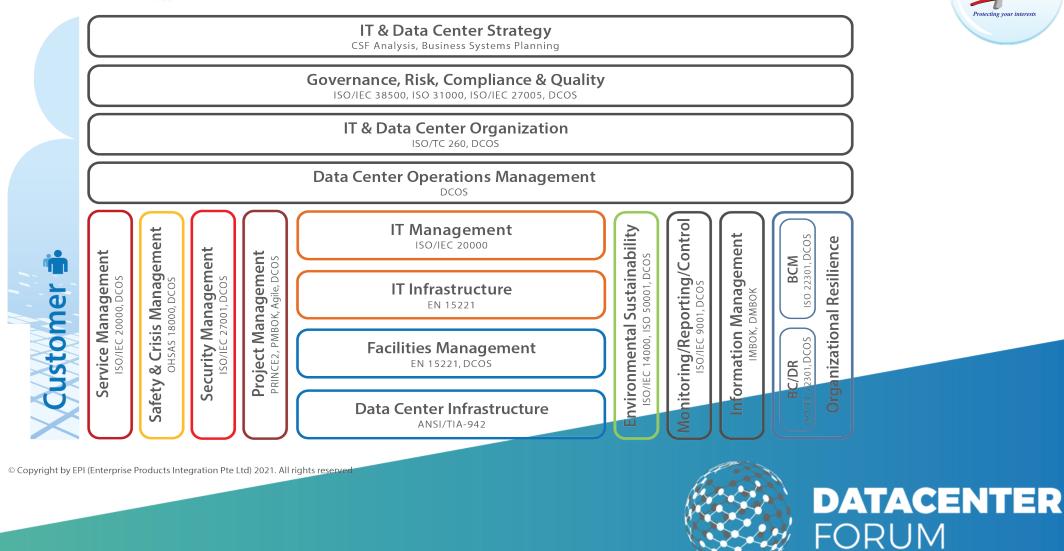

- Human Error is predictable!!

- Because human error is predictable, we can develop processes/ procedures/training for;

  - Prevention

  - Consequence minimization

Organizational Resilience

DATACENTER FORUM

11 Disciplines covered by EPI-DCOS®

1. Service Level Management
2. Organization
3. Safety Management
4. Security Management
5. Project Management
6. Facilities Management

7. Data Centre Operations
8. Environmental Sustainability
9. Monitoring/Reporting/Control
10. Organizational Resilience
11. Governance, Risk and Compliance

DCOS® Sub Disciplines

Example: Service Level Management (SLM)

- Needs analysis
- Technical requirements
- Support requirements
- Commercial and legal requirements
- Service catalogue
- Service Improvement Plan (SIP)
- Service Level Management (SLM)

- Incident management integration
- Escalation policy and procedures
- Vendor management
- Reporting
- Complaint procedure
- Customer satisfaction management
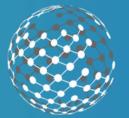

DC-Operations maturity levels

DCOS-1 Initial	DCOS-2 Repeatable	DCOS-3 Define	DCOS-4 Managed	DCOS-5 Optimized
No/Little; •Documentation •Monitoring •Training •Process	•Undocumented processes, high reliance on personnel	•Standardized and documented procedures	•Processes are measured and controlled •Continuous improvement programs	•Integrated processes •Continuous improvement programs
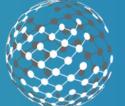

How to get the most out of DCOS®

1 • Read the DCOS® to understand the big picture

2 • Determine which disciplines/domains to improve

3 • Perform a gap analysis / audit

**4** • Prepare a realistic action plan

5 • Celebrate success

**6** • Expand scope / improve maturity / maintain

Datacenter growth

Not enough (experienced) datacenter staff available

Lack of skills on datacenter facilities

Exponential data growth

More Focus on Environmental Sustainability

The world is changing…

Adoption of Cloud computing continues with hybrid being a key strategy

AI – Often an abused word. True AI will add value with cooling being the first target

Mobility and 5G create both challenges and opportunities

New competences are required. Skill gaps are widening

DATACENTER FORUM

Training challenges

Which outcome of skills, knowledge and competences?

How can I create a structured training plan?

Which training provides the right outcomes?

How do I convince management?

FUTURE

DATACENTER FORUM

DCCF®
Data Centre Competency Framework

- The first and only competence framework for datacenters
- Based on the "e-Competence Framework (e-CF)"
- As well very useful for management / HR
- Describes competences and job roles (38)
- Download for free on - www.epi-ap.com/dccf

DATACENTER
FORUM

Course selection criteria

❏ Is the course provider a data centre expert?

❏ Trainers with hands-on experience?

❏ International Standards Based?

❏ Vendor Neutral?

❏ Independent/Impartial Exams?

❏ Globally recognized?

Most of all…..

- **Does it teach you the competences required?**

How to get ready for the future?

1 • Review your current and potential future job role

2 • Analyse current and future competence requirements (GAP analysis)

3 • Define timelines

4 • Find the right accredited courses

DATACENTER
FORUM

Most importantly

Make an appointment with

YOURSELF

Closing remarks

Change, change, change

1

The world markets are changing and so is the IT and Data Centre market and at an ever increasing pace…

Business as usual doesn't exist!

Remember the 3 P's

A resilient data centre infrastructure is important but it is NOT the only factor for high-availability

2

Processes

3

Ensure that all processes

1. Meet the maturity level required

2. Are under full management control

3. Are well/fully integrated

People

4

The future starts **now**, the world is **not** going to wait for you….

1. Planning is everything

2. Competence requirements are changing at an ever increasing pace

3. Invest in yourself and staff

Make an appointment with yourself!

2. DCOS® – Datacenter Operational Standard

3. DCCF® – Datacenter Competence Framework

CDCP®
Certified Data Centre Professional

Hottest selling course

epi
Protecting your interests

(2-day course)

DATACENTER FORUM

What is CDCP?

- 2-Day course exposing candidates to all the fundamental knowledge related to design, build and optimize data centres

- Course address Standards and all the technical matters

- Explains design requirements as well as various technologies

- A lot of practical experience from veterans in the data centre industry

- Exam; 1 hour, 40 questions, closed book, 27 correct to pass

- Prerequisite: None
